

Visible Body's Human Anatomy Atlas 7 Recognized with Two Tabby Awards for Top Consumer Tablet Apps

June 29, 2015—Visible Body today announced that it has been awarded two Tabby Awards for its Human Anatomy Atlas 7 iPad/iPhone app. Atlas, the premier visual resource for healthcare professionals and students, was recognized as both the Overall Winner and the Users' Choice honoree in the iPad—Books, Reference & Medical category.

The Tabby Awards is the only global competition recognizing the top consumer tablet apps in the market. The winners were selected by an international panel of independent judges, chaired by The Huffington Post chief technology officer Otto Toth. The Users' Choice honorees were determined by over 100,000 votes from app users.

"We are proud and excited that Human Anatomy Atlas has been recognized as the best of the best by the Tabby Awards," said Visible Body CEO Andrew Bowditch. "It is doubly gratifying to be recognized as an innovator by the judges and also to be celebrated by our users."

The Tabby Awards judging panel recognized Human Anatomy Atlas as a "very engaging and accurate application that manages to do significant rendering and display on a limited tablet processing power. Great design and intuitive to use."

About Visible Body

Visible Body's 3D anatomical models of the human body make learning and teaching anatomy and physiology visual and engaging. We invent apps that advance the way students learn and healthcare professionals practice. Over a million people have used our products over the web, on iPads, iPhones, Android devices, PCs, and Macs.
